

Side Track Saw Tables LLC

What makes the Side Track Saw Table Different?

More benefits with none of the drawbacks!

- **18 Pre-Set Pitch Positions** (*change between pre-set positions as quickly as you can on a Miter Saw*)
- **Use it anywhere on the Jobsite** (*including on scaffolding*)
- **Light-Weight** (*less than 40 pounds*)
- **Compact Design** (*5' x 2' x 4" – and folding version folds down to fit in the trunk of a car*)
- **Works with Cordless Saws** (*no more generators or generators*)
- **Commercial Grade Build Quality** (*built to last from aluminum frame & high quality PVC table top*)
- **Set Up in Under One Minute** (*Can be set up on regular saw horses, mounted on a miter saw stand, or set up on scaffolding*)
- **Can Cut Material up to 1 ½ inch Thick** (*Contractors have used it to cut all types of material including, but not limited to vinyl, aluminum, fiber cement board, lumber, decking, standing seam roof metal, and more!*)
- **Material Stop allows for ease of repeat cuts** (*Great for cutting soffit and other repeat pieces*)
- **Affordable** (*The Side Track is several hundred less than similar products*)
- **User Friendly** (*can make even a novice cut guy seem like he has been doing it for years*)
